

The Prosperity Phenomenon – A Revelation of the Day of Jehovah Tsaba In Light of President-Elect Donald Trump’s Political Win

None of the political spectrum is prepared or capable of addressing the state of the Financial Condition of the United States of America as a “nation.” While government leaders may address themselves to changes in the way we “manipulate” our day-to-day economic affairs, as we will show, there is no way for them to address the “Debt Nation” we have become. Let me explain why our government leaders are unable to deliver us from the bottomless pit of debt that has developed.

Although the national debt owed through the Treasury Department’s issuance of Treasury Bonds is now approaching \$20 Trillion dollars (\$20,000,000,000,000.00), that by no means represents the total debt load of our nations, which experts put at somewhere over \$210 Trillion, although they acknowledge it could also easily be over \$500 Trillion when looking at all the additional government contracts and promises to its citizens of future benefits, etc., not to mention business/industry/personal debt.

In any case, we are as debt-ridden as Egypt, in the time of Joseph was “grain-rich,” when the scripture declares:

Genesis 41:49 LITV And Joseph heaped up grain like the sand of the sea, exceedingly much, until **he ceased to count it, because it was without number.**

Genesis 41:49 MSG Joseph **collected so much grain**--it was like the sand of the ocean!-- that **he finally quit keeping track.**

In the reverse, this is where the United States, along with the rest of the entire civilized industrial world has come. Decades ago, they removed anything of value from the foundation of their economies (following the experiment of the United States Federal Reserve and U.S. Treasury Department), and thus the whole world adopted a “Fiat Currency System” in which the nations of the world, allowed the Federal Reserve System (and all the Central Banking Systems of all nations), leaving nothing but a “Debt System.”

Today, as citizens in the world economy, we are all paid in money that serves as an “IOU” allowed to be passed around within our own national money system, but which has no value outside of the system. The only thing of value is what stands behind the IOUs, which is the Treasury Bonds behind those IOUs, held by other nations with which we trade.

Global Trade, then, becomes the “glue” that binds us to those to whom we owe our Treasury Bond Debt. This allows those who hold our Treasury Bonds (China #1, Japan #2, and Great Britain #3, followed by Brazil). But over the past 10 years, the U.S. Federal Reserve System,

which takes possession of U.S. Treasury Bonds in exchange for our money supply, because most National Banks (China, Japan, etc) stopped buying our bonds, as they issued the Bonds, simply have been being held by the Federal Reserve Bank System, which means that portion of our debt is owned to the Rothschild banking dynasty that owns all of the Central Banking Systems of the World, and is not subject to our "Trade Equity" agreements with other countries. Furthermore, it places their power and influence over us as citizens (across the world's nation states) to call our bonds whenever they might choose to do, without the same considerations of China, Japan, etc., who wish to continue trade with us.

Donald Trump's plan to renegotiate all of our national trade agreements, will find quickly its hands more tied than expected with these countries due to the amount of our Treasury Notes held by them. Remember:

Proverbs 22:7 KJV "...the borrower is servant to the lender."

Our trade agreements with the larger industrialized nations will be virtually impossible to negotiate due to the fact they we are their servants, as they hold over us our enormous debt owed.

Why it is Impossible to Reverse Our National Debt

"Liabilities" may only be reversed by "Assets." For example:

Let's say that you have no income except from cashing out your credit cards. You owe \$200,000 on your home, \$20,000 on your autos, and your monthly electricity, gas, cable, phone, insurance protection policies, etc. Because you have no "real" income, your only way to pay your debts is with your credit cards, or cash from them.

While you may be paying off your mortgage and automobile, you are not decreasing our debt load because you are paying them off with other "credit" instruments.

Where are the only U.S. assets? They are in the Real Estate holdings of our citizens, along with any other "real assets" such as personal holdings of gold, silver and other precious metals and raw jewels. The reason why automobiles, etc. do not count as "real property" (like real estate), is because it is a "depreciable asset," meaning it is wearing out, and scheduled to become "worthless" at some point in the not-too-distant-future.

That is the totality of our "assets." All that industry produces is "depreciable assets" In other words, the nation's "gross GDP (goods produced nationally) have no permanent value as they are all in the category of goods scheduled to be soon worthless. If industry was producing "real

wages” in money, and building up our money supply backed by a “silver dollar” for every dollar bill paid for wages, then as the money supply grew, our “assets” as a nation would be increasing.

But since our money is only “IOUs” to the Federal Reserve System, all the increase of our wages do, are to increase our national debt.

This leaves us, as a nation, and citizens of our nation with nothing to produce to pay debt, except our “real property” consisting of our homes, and individual precious metals held personally and nothing else!

If China, and the others (including the Federal Reserve Bank) were to call our national debt, the government (again) would be forced to demand its citizens to turn over to them any “real property” (Real Estate, and precious metals primarily) to the government. The government would not remove you from you home, but it would take your gold and silver, etc. as it did the gold in 1933.

Executive Order 6102 is a United States presidential executive order signed on April 5, 1933, by President Franklin D. Roosevelt "forbidding the Hoarding of gold coin, gold bullion, and gold certificates within the continental United States". The effect of the order, in conjunction with the statute under which it was issued, was to criminalize the possession of monetary gold by any individual, partnership, association or corporation.

The stated reason for the order was that hard times had caused "hoarding" of gold, stalling economic growth and making the depression worse. *The New York Times*, on April 6, 1933, p. 16, wrote under the headline "Hoarding of Gold", "The Executive Order issued by the President yesterday amplifies and particularizes his earlier warnings against hoarding. On March 6, taking advantage of a wartime statute that had not been repealed, called the “Trading with the Enemy Act” of Congress, he issued Presidential Proclamation 2039 that forbade the hoarding 'of gold or silver coin or bullion or currency,' under penalty of \$10,000 and/or up to five to ten years imprisonment." Every U.S. Citizen was required to accept the confiscation of any commercial Gold coins, bars, etc. minted or mined within the United States, and turn it into the nearest bank licensed by the Federal Reserve (local commercial banks), under criminal penalty of law.

The most wealthy families of the nation, being privy to what was about to be done by their government, quickly exchanged their U.S. minted gold and silver for “foreign” mints of gold and silver, and were thereby, exempt of giving up the “hard assets.” The remainder of U.S. citizens, un prepared for such an order, were forced to either turn it in for U.S. dollar “notes” (cash) or become a criminal when the Treasury agents showed up at their doors.

At that time, the national debt was of such, that turning the gold of its citizens to the Federal Reserve, who then passed it on to the owner banks of the Federal Reserve (which in turn was

owned by the various entities of them Rothschild family) was enough to satisfy the excess debt service (overdue interest on Bonds).

Today, the United States is unable to service its monstrous debt, and in extension for interest owed, we have set a pattern negotiating better terms for those nations we owe via more favorable "Trade Agreements." This has included turning over our manufacturing and moving it to their countries in exchange for interest and debt owed them for which we are unable to pay.

The President Elect, Donald Trump, is subject to hitting a "brick wall" when attempting to get better trade deals with China, Japan, Great Britain, and other nations to whom we owe our debt. It is possible to better negotiate trade with the poorer countries, i.e. Mexico, but not with the greater industrialized nations to whom we owe our debt.

So how can we ever pay our national debt.

The \$210 - \$500 Trillion dollars owed, is more than all of U.S. "real property, i.e. Individual Real Estate and precious metal holdings" of our citizens.

Since any other "wealth" is on paper only, backed by other debt), we can't decrease our liabilities with "other liabilities." Our prior government leaders have been deceived into giving away the nation's build-up of true wealth, by entering into unbelievable amounts of debt, and doomed us from ever paying our debt.

President Elect Donald J. Trump may be able to affect many national policies to manipulate change within the "system," but he, nor any other world leader, has any power to change the "system" within its current boundaries.

National and world leaders are powerless to do anything about it due to the fact that they have nothing to deal or bargain with.

At some point, it will all come crashing down... according to the revelation of Isaiah 2:11-12, and God will orchestrate an event in which the true wealth of the world will be converted to the body of Christ, the Church.
